

STATEMENT OF WORK

Purpose: Purchasing of panels, gates, and stock tanks to be used by Black Mesa Ranger District horse program. Must be adequate for ungentled horses.

Need: 24' panels

Specifications:

- Must be 24' long.
- Top rail must be at least 6' high and bottom rail no more than 1' off the ground.
- Must have a minimum of 4 rails between the top and bottom rail, must be a minimum of 7/8 inch solid bar.
- Must have at least 2 vertical stays to reinforce the rails.
- Must have a way to connect to other panels.
- Frame of the panels must be a minimum of 2 ½ inch OD pipe.
- Must be free standing with a minimum of 2 feet per panel.
- All components must be made of steel.

Need: 24' panels with 12' gates

Specifications:

- Must be 24' long panels with 12' gate attached.
- Top rail must be at least 6' high and bottom rail no more than 1' off the ground.
- Panels and gates must have a minimum of 4 rails between the top and bottom rails.
- Horizontal rails on panels must be a minimum of 7/8 inch solid bar.
- Panels must have at least 2 vertical stays and gates must have at least 1 vertical stay to reinforce the rails.
- Gates must have a way to secure open or shut.
- Must swing at least 180 degrees.
- Frame of the panels must be a minimum of 2 ½ inch OD pipe.
- Gates should be a minimum 1 ½ inch OD.
- Panels must be free standing with a minimum of 2 feet per panel.
- All components must be made of steel.

Need: 750-gallon rectangular polyethylene stock tanks

Specifications:

- Must have a drain plug.
- Must be rectangular or square.
- Must hold at least 750 gallons of water.
- Must be made from polyethylene material.

Need: 12' bow gates

Specifications:

- Gates must come attached and with a way to secure it open or shut.
- Gate must be 12' long and top rail at least 6' tall and bottom rail no more than 1' off the

ground.

- Gates must have a minimum of 4 rails between the top and bottom rails.
- Gates must have at least 1 vertical stay to reinforce the rails.
- Must swing at least 180 degrees.
- Frame of the bow must be a minimum of 2 ½ inch OD pipe.
- Gates should be a minimum 1 ½ inch OD.
- Overall height must be at least 10' tall.
- Must be free standing with a minimum of 2 feet per panel.
- All components must be made of steel.
